Summary

B.Tech Computer Science Engineering student with expertise in programming, data structures, algorithms, and software development. Skilled in Java, Python, C++, HTML, CSS, JavaScript, and SQL with strong problem-solving and teamwork abilities, seeking opportunities in software development and IT roles.

Education

B.Tech in Computer Science (AI & Robotics)

CGC University, Mohali

July 2024 – July 2028

Curr CGPA: 8.21

Senior Secondary Education

GIC Paithani, Uttarakhand

2024

Percentage 70%

Secondary Education

GIC Paithani, Uttarakhand

2022

Percentage 73%

Skills

Programming: C, C++, Java, Python, SQL

Web Development: Html, CSS, React, Node.js

Coursework: DSA, OOPs, DBMS

Soft Skills: Leadership, Communication, Quick learner, Time Management, Teamwork

Work Experience

AI INTERN

Plasmid Innovation (Remote) — 2 Months

Jul 2025 – Sep2025

- Worked on real-time Artificial Intelligence & Machine Learning projects.
- Implemented ML models using Python and Scikit-learn.
- Performed data preprocessing, feature extraction, and evaluation.
- Gained practical exposure to AI workflows and project deployment basics.

Project

Fake News Classification (Machine Learning Project)

- Built a machine learning model to classify fake and real news
- Applied text preprocessing and feature extraction techniques.
- Implemented classification algorithms to improve accuracy.
- Tools: Python, Pandas, Scikit-learn

AI Placement Eligibility Checker

- Developed an AI-assisted Placement Eligibility Checker to evaluate student eligibility for campus recruitment based on academic records and predefined criteria.
- Integrated AI-powered analysis to streamline eligibility verification and provide faster decision support.
- Designed a user-friendly interface for students and placement coordinators to check eligibility status efficiently.
- Improved the screening process by automating candidate evaluation, reducing manual effort and errors.
- Generated detailed eligibility reports and recommendations, helping students identify qualification gaps and prepare for placement opportunities more effectively.

E-Bill Pro: Smart Electricity Billing System

- Engineered a smart electricity billing system using Java and SQL for automated bill generation and customer management.
- Designed a relational database to efficiently manage consumer records, billing details, and payment transactions.
- Implemented billing automation and payment tracking features to enhance operational efficiency and data accuracy.
- Developed intuitive administrative modules for seamless billing and account management.

Certificates/Letters

AI Intern Completion (Sep 2025), Web Development (April 2025), Recommendation Letter from Plasmid (Sep 2025), Infosys Springboard Java and Python Certificates

Campus Involvement

- Member of the Training and Placement Cell (TAC), assisting in placement coordination and student engagement.
- Assisted in organizing campus recruitment drives and placement-related events.
